

WClean - a new Smart Toilet

WClean is a new smart toilet concept that combines a bidet and a WC in a single product. Years of research and development have made it possible to merge the best Korean technology with the functionality of many patented extra features and with the elegant aesthetics that distinguish GSI sanitary ware. The electronic bidet is the beating heart of WClean, designed to meet the requirements of both private residences and contracted environments. A stainless steel nozzle provides intimate hygiene, while drying is performed by a high efficiency device. The "automatic bowl draining" function and the lime scale remover make WClean both reliable and hygienic.

The smart toilet evolution

The suspended sanitary unit is the result of a long study that led to the creation of a technically flawless and totally functional product. Neutral and spare lines accommodate different needs in the composition of the bathroom environment.

Main features

A new system was developed consisting of five elements: the toilet bowl, the fixing plate, the electronic bidet, the casing that contains it and the seat. 26 months of work, 7 teams, 54 people were involved in the creation of what we believe is the most functional and hygienic smart toilet on the market. A simple product, revolutionary and particularly sensitive to environmental impact.

Cleansing function

Customise your experience with the possibility of **selecting the nozzle position**, adjusting the **water pressure** and **temperature** according to your preferences. For optimal feminine hygiene, a **gentle water jet** has been developed, ensuring gentle and thorough cleaning. Full customisation allows you to find the ideal configuration for maximum comfort. The Smart Toilet offers **two water jet intensities** to suit every need. The **warm air drying** function with an **air jet adjustable in temperature and intensity** completes the experience, ensuring well-being and convenience.

Wide range of finishes

Swirlflush®

Like all GSI sanitary ware, our Smart Toilet features the Swirlflush® rimless flush system. With impeccable water efficiency, it meets sustainability requirements without compromising performance.

LED Night light

A tiny light under the bowl will guide you to find your WClean at night. Choose your favorite color. 5 colors of intensities, 5 Levels of brightness.

Energy Saving

Always keep your selected energy saving option under control.

Anti-lime function

Deep cleaning thanks to an effective programme for lime scale removal. Uses the decalcifying liquid Durgol® especially developed on the basis of water hardness.

Automatic cleansing of the nozzle

The nozzle is washed before and after each use. The nozzle can also be washed manually or with the dedicated programme.
